What is photoluminescence and safety way-guidance system?

Photoluminescent signage glows in the dark which is vital if there is no light due to a power outage or if thick smoke from a fire is obstructing vision. This type of signage will assist employees or the public to a safe refuge area away from the danger.

The benefits of using a photoluminescent SWGS

Clearly demonstrate your commitment to safety of employees, customers and visitors by installing photoluminescent signage on your site

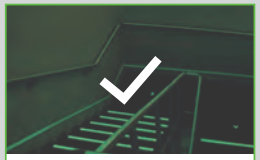
SAFE GUIDANCE TO NEAREST EXIT
Highlights nearest fire exits, fire extinguisher locations and alarm points

HIGHLY VISIBLE THROUGH SMOKE
Unaffected by power failures and visible through smoke, reducing firefighter evacuation time by 30%

MAINTENANCE FREE
Cost effective and low maintenance compared to electrically powered signs

LONG LASTING
Provides reassurance in emergencies like a blackout, without delay that frequently takes place with emergency lighting up on activation

RECHARGEABLE
No external power source or batteries required saving energy and lives



SAFE EVACUATION DOWN STAIRWAYS
The exit route is clear and unambiguous, reducing incidents of slips, trips and falls

EASY TO INSTALL
Buy the complete SWGS solution, kits provide clear, easy-to-read instructions

COST EFFECTIVE
Maintenance free, low cost, environmentally friendly and safe to handle

Here at Seton we have two photoluminescent materials called Xtra-Glo and Nite-Glo.

To fully comply with ISO 16069 you will need to ensure that you install Xtra-Glo signs on your premises.

Illuminates once activated by a good light source.

PSPA Class B specification.

The ideal, cost-effective solution for introducing photoluminescent signs to your premises.

Illuminates for longer than NITE-GLO once activated by a good light source.

PSPA Class C specification.

Ideal for identifying emergency exits, escape routes and equipment, even when power fails.

30% FASTER

Research suggests that firefighter evacuation can be over **30% faster** with photoluminescent signs and safety way-guidance systems

TOUGHWASH® Washdown Resistant Signage

Signage for the food and beverage industry

- Withstands high temperatures, intense water pressures and the harshest food and beverage washdown cycles
- Outstanding durability, fade resistant, withstands the test of time

Increased workplace safety and compliance

- Prohibit actions that can be extremely dangerous in specific situations
- Warn employees of present danger and highlight actions required to work in a safe way
- Increase compliance with EU Directive 89/655/EEC and with the EN ISO 7010 and EN ISO 3864 standards.

Food safety: OK!

- Designed to avoid food contamination
- Signs do not crumble when exposed to cleaning agents or pressure
- Uphold the highest levels of food security.

Easy to clean

- Resist typical cleaning agents used in the food industry
- Stay attached and remain legible, even when exposed to 70 bar (1000 PSI) under a straight angle from 15cm away
- Resist most washdown cycles in the stringent hygiene requirements faced by food industries.
